INTRODUCTION

Star Trace offers a range of products which are widely used across various laboratories and also hold diverse industrial applications.

These wide range of products are manufactured according to industrial quality and standards.

Backed by our excellent engineering and quality control team, we are able to satisfy the client requirement for various engineering products all over the world.

With more than 20 years of experience in this field, we have been supplying technically accurate and superior products to our clients and have catered to the requirement of variety of sectors and clients.

HYDROCYCLONE MODEL: STHC - 1

Brief Description: Hydrocyclone has no moving parts.

It consists of a conically shaped vessel, open at the bottom, variously called the underflow, apex or spigot and connected to a cylindrical section which has a tangential feed inlet.

The top of the cylindrical section is closed with a plate through which passes an axially mounted overflow pipe.

The pipe is extended on to the body of the cyclone by a short, removable section known as vertex finder, which prevents short circulation of feed directly into the overflow.

Parameters

Hydrocyclone diameter	1" ~ 12"
Process	0.8~85m ³ /h
Cone angle	6° ~ 20°
Working pressure	0.03~0.5MPa
